

# OVER PRESSURISATION SKID

Air operated, 10psi to 20,000psi range. Over pressurisation skid designed to be installed in-line during pumping / pressurisation operations to provide protection against accidental over-pressurisation of system or temperature.

## Features

- Manual adjustable range, unit can be set from 10psi to 20,000psi (depending on skid)
- Once set, skid will automatically sense any over pressurisation of the system and will shut down the pump whilst safely venting excess pressure
- Comes with complete set up instructions
- Three ranges available - 10psi to 10,000psi, 75psi to 15,000psi and 10,000psi to 20,000psi
- Well proven and trouble free operation
- Internal relief valve to protect skid
- Low cost servicing
- Stainless steel framework built with robust construction
- Lifting handles

Typical Overall Dimensions: 87 x 51 x 70cms

Typical Approximate Weight: 81kgs

Customs Code: 8481 1099
