

PN / DN TEST FLANGES

PN Pressure Rating:

PN stands for **P**ressure **N**ominate and prefixes the pressure rating e.g a PN16 flange is designed to operate up to 16bar. Typical ratings include PN6, PN10, PN16 PN25, PN40, PN100.

Nominal Diameter (DN):

DN stands for **D**iameter **N**ominal and is a translation between imperial and metric sizing (though not exact).
